PART 01 Motivation

User Workload Variety

Transactional

Analytics

Realtime

Monitoring

Graph

ML

...?

Engine Specialization

“One size does not fit all”

Analytics

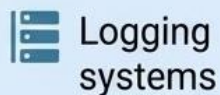

Realtime Infra

Graph

Monitoring

Transactional

ML

- Very limited reusability.
- Duplicates efforts and forces engineers to reinvent the wheel.
- Hard to maintain and enhance.
 - Where do we optimize?
- Exposes inconsistencies to end-users.
- Hurts our capacity to move fast and innovate.

Through the Looking Glass

Different, but not really...

	Presto	Spark	DPP	XStream
Language Frontend	<i>Presto SQL</i>	<i>HQL / DataSet API</i>	<i>Koski DataFrame</i>	<i>UPM</i>
IR	<i>Presto IR</i>	<i>Spark IR</i>	<i>Koski IR</i>	<i>UPM IR</i>
Optimizer	<i>Presto Optimizer</i>	<i>Catalyst</i>	<i>Koski Optimizer</i>	<i>XStream Optimizer</i>
Execution Runtime	<i>Presto Runtime</i>	<i>Spark Runtime</i>	<i>DPP</i>	<i>XStream Runtime</i>
Execution Engine	<i>Presto</i>	<i>Spark</i>	<i>Koski</i>	<i>XStream Codegen</i>

Through the Looking Glass

PART 02 The Velox Library

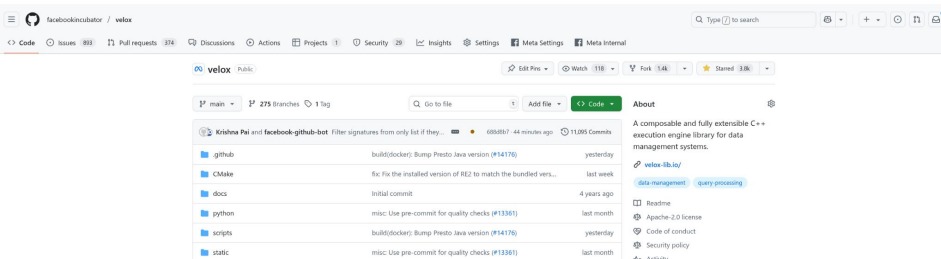

PART 03 Open Source

Velox - Open Source

- Publicly announced [in Oct'22](https://engineering.fb.com/2022/08/31/open-source/velox/)
 - <https://engineering.fb.com/2022/08/31/open-source/velox/>
- Available in github:
 - <https://github.com/facebookincubator/velox>
- Fast growing open source community
 - +250 developers
 - Meta, IBM, Intel, Voltron Data, Microsoft, Google, ...

VeloxCon China 2025

- Chinese communities have made tremendous contributions to Velox.
- VeloxCon China to bring the communities closer together

Engineering at Meta

[Open Source](#) ▾ [Platforms](#) ▾ [Infrastructure Systems](#) ▾ [Physical Infrastructure](#) ▾ [Video Engineering & AR/VR](#) ▾

POSTED ON AUGUST 31, 2022 TO DATA INFRASTRUCTURE, OPEN SOURCE

Introducing Velox: An open source unified execution engine

重要 Open Source 消息将会在 VeloxCon China 2025 公布

Important Open Source news will be announced at VeloxCon China 2025

欢迎加入我们首届 VeloxCon China 2025

You are welcomed to join us for our first VeloxCon China 2025

12月13日（下周六）| 北京蚂蚁集团办公室

December 13 (Next Saturday) | Beijing @ Ant Group Offices

<https://veloxcon.io>

PART 04 Applications of Velox

● First integrations:

○ **Meta's XStream - Streaming System**

- Runs entirely on Velox today.

○ **Meta's ETL Ingestion System**

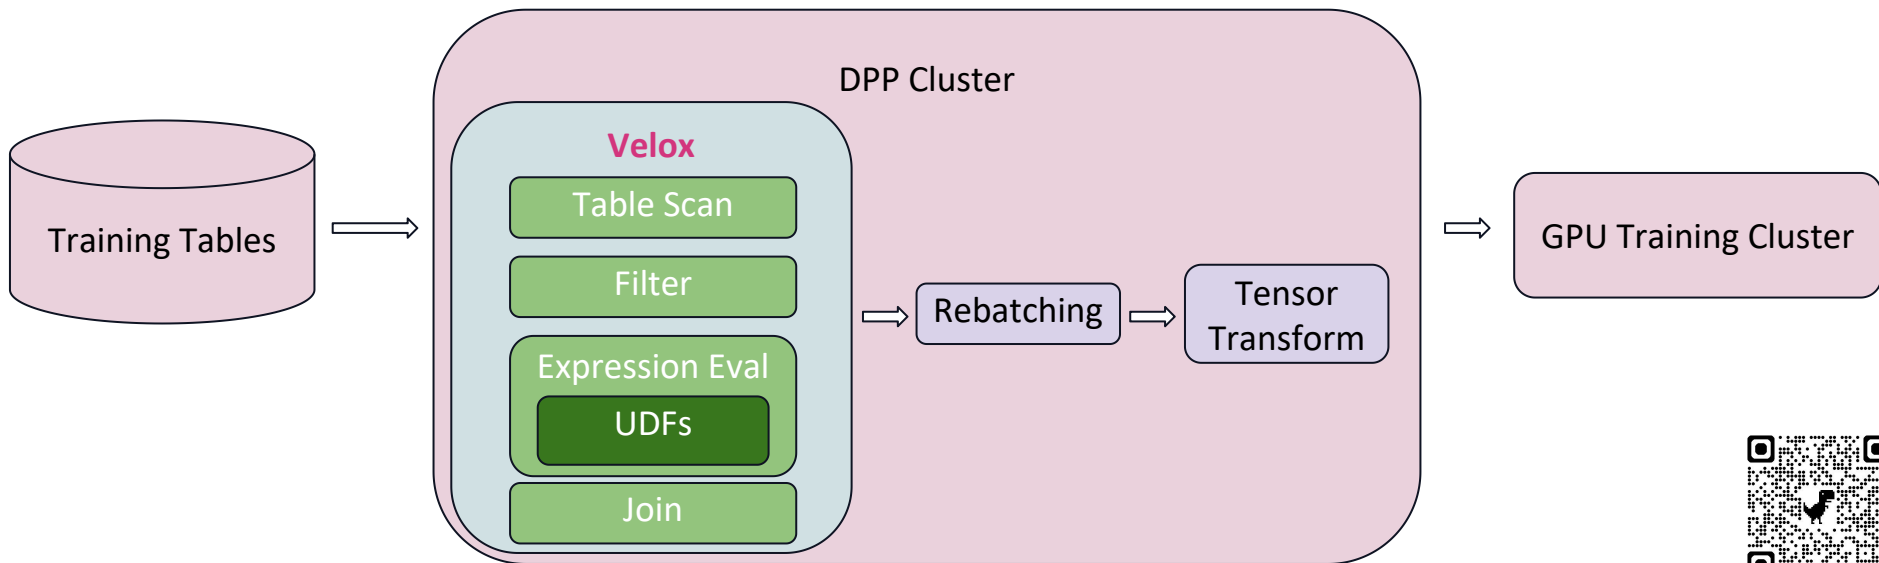

- data warehouse and database ingestion.

○ **Meta's Messaging System**

- DPP - Data Pre-Proc (Training data loading):
 - DPP today built on Koski
 - **Veloski** => Koski with Velox as eval.
 - Ongoing work; handful of initial models in prod using Veloski.

Use Cases: Presto -> Prestissimo

- Prestissimo: Presto with a Velox-based worker.
 - Same JVM coordinator.
 - Worker is C++ only (Velox).
 - Supports Vector Search
- Transparent to users - same PrestoSQL semantic.
- **3-10x** efficiency gains (depending on workload).
- Almost 100% rollout to different Presto flavors (Streaming Shuffle):
- OSS: available on IBM's watsonX.data cloud.

Use Cases - Presto-on-Spark -> Native-Presto-on-Spark

- New architecture for Presto-on-Spark
 - Same Presto-on-Spark frontend
 - Executor of modified Spark JVM with sidecar Prestissimo worker (Velox).
 - Supports Vector Search
- Transparent to users - same PrestoSQL semantic.
- **2x** efficiency gains.
- 10% already in production.
- OSS: code available on prestodb + velox

● PySpark -> **PySpark/Velox**:

○ Architecture overview

- Python frontend to build Velox plan;
- Spark scheduling to coordinate work distribution;
- Velox backend for high efficiency compute

○ Already in prod; limited query shapes.

○ Focused on AI customers.

Use Cases - Apache Gluten

- **Apache Gluten:** transparent to users

- Ongoing work at Meta
- Available at Google, Microsoft, IBM, and Alibaba clouds.

COSCon'25
